

Virtual Birth and Wellness Provider Directory

What is the directory trying to address?

The lack of access, information, and awareness of birth and wellness resources along the Central Coast of California.

Why is it important to address this?

Many individuals and families are unaware of the options and resources available to them; which can add a layer of stress to their birth journeys.

How are we addressing this?

By making the process of finding birth and wellness resources easier and more accessible to all.

What will the directory look like?

The virtual directory will be accessible on the CCCN website in an approachable and user-friendly format.

The impact we hope to make

Assist individuals and families in San Luis Obispo and Northern Santa Barbara Counties in their birth journeys, and help them find the support they need.
